PROFILE SUMMARY

Senior Full Stack Developer with 5+ years of experience building enterprise SaaS applications, reporting and analytics solutions, and third-party system integrations. Experienced in designing inventory, invoicing, and resource-planning dashboards with breakdown analysis, building scalable React.js and Node.js applications, optimizing PostgreSQL databases, and integrating external business systems through secure APIs.

TECHNICAL SKILLS

Frontend	React.js, Vue.js 2 & 3
Backend	Node.js, Laravel (PHP), .NET Core, ASP.NET Core Web API
Database	SQL Server, PostgreSQL, MongoDB, Redis
Cloud & DevOps	Cloudflare, Laravel Forge, GitHub Actions, Docker, IIS, Microsoft Azure
Testing	Playwright, Postman, Swagger (OpenAPI), SonarQube
Tools	Git

CORE COMPETENCIES

Technical Leadership | System Design | REST API Design | Performance Optimization | Cross-functional Collaboration | Agile/Scrum | Sprint Planning | Code Review | Mentoring | Problem Solving

EXPERIENCE

Senior Full Stack Developer <i>ProcessDrive India Pvt. Ltd</i>	Oct 2020 – Present <i>Hosur, Tamil Nadu</i>
- Lead the architecture, development, deployment, and continuous enhancement of three enterprise SaaS products used by over 150 business customers. - Designed and developed reporting modules (invoicing, resource planning, inventory) that surface breakdown/variance analysis and drive downstream recommendations for business teams. - Built two-way integrations between web applications and external systems (Tripletex, PowerOffice, Shopify, Razorpay, Shiprocket, Microsoft Graph), significantly reducing manual reconciliation effort through automated synchronization. - Improved API response times from 2.5s to 400ms using Redis caching, query optimization, and async processing; optimized SQL Server and PostgreSQL databases with 5M+ records for 60% faster queries. - Deployed and maintained services on Microsoft Azure (Blob Storage, App Services) using Docker and CI/CD pipelines (GitHub Actions). - Implemented Playwright-based end-to-end automation, improving regression stability and cutting manual testing effort across releases. - Lead and mentor a team of 3 developers and 2 testers using Agile/Scrum practices (sprint planning, code reviews); mentored 5+ developers, reducing critical production incidents by 35%.	

KEY PROJECTS

Digitool – Multi-Tenant ERP & Business Management Platform (Norway) <i>Vue.js, .NET Core, SQL Server, Redis, Azure, Microsoft Graph (Sharepoint, Outlook)</i>	2022 – Present
- Built ERP reporting and analytics modules – Procurement & Inventory, Time Management, Booking & Resource Planning – including breakdown/variance views used to drive operational recommendations. - Built and maintained two-way system integrations (Tripletex, PowerOffice) enabling automated reconciliation and significantly reducing manual reconciliation effort. - Implemented RBAC and audit logging for compliance and security across 150+ tenant organizations. - Optimized SQL Server performance via advanced indexing, Redis caching, and async processing, cutting API response times from 2.5s to 400ms on datasets with 5M+ records.	

- Integrated IoT sensor and temperature monitoring data into enterprise dashboards, enabling real-time visualization, trend analysis, and operational monitoring for business users.

Rentasst – Rental & Sales Management Platform

2024 – Present

React.js, Laravel, PostgreSQL, Redis, Razorpay, Shiprocket

- Built a customer-facing storefront and unified product catalog with variant management, supporting rental and sales workflows without duplication.
- Designed and implemented inventory modules supporting purchase, returns, adjustments, transfers, warehouse operations, asset lifecycle management, and serial-number tracking using PostgreSQL for scalable transaction processing.
- Implemented end-to-end rental lifecycle workflows – booking, fulfilment, and returns – integrated with Razorpay payment processing and Shiprocket logistics.

Syfol – No Code/Low Code ECM Platform (SharePoint-based)

2020 – 2022

React.js, Node.js, MongoDB, Microsoft 365, SharePoint

- Developed a configurable no-code/low-code platform enabling organizations to build custom workflows, reporting modules, and document management solutions without writing code.
- Implemented Microsoft 365 sign-in and data-sync flows to onboard users and integrate external workspace data into the platform.

ACHIEVEMENTS

- **Operational Excellence Award (July 2026)** – Recognized for consistent operational impact and delivery excellence across concurrent projects.
- **Best Performer of the Year 2025** – Recognized for technical excellence and measurable business impact across multiple products.
- **Quality Excellence** – Delivered multiple consecutive releases with zero critical production incidents.

EDUCATION

Bachelor of Engineering in Computer Science

2016 – 2020

C.A.R.E Group of Institutions, Anna University
